
Open TrueCrypt volume and start expansion in order to expand existing space. Keymacro is a TrueCrypt volume expander that comes with a host of useful tools that allow you to expand volumes and partitions without formatting. The program starts from where TrueCrypt left off without having to restart. When the volume is opened, extcv immediately start the expansion process in a background window. You are allowed to customize the expansion process, including the new size, the amount of new space you want to add, and the filling data. Once you click Expand to enlarge a volume, you will have to wait while extcv scans the disk for TrueCrypt volume and partition. The process can take several hours to finish and may result in disk fragmentation. After the task is finished, you can view the progress in a separate window, along with a number of general information about TrueCrypt volume, the expanded volume, and the amount of data that was used for expansion. The program allows you to start the expansion job as many times as you need without the need to reinstall TrueCrypt or reboot the PC. Additionally, extcv provides a great feature that allows you to easily restore a TrueCrypt volume to its original size. Additional features include: * Supports TrueCrypt volumes and partitions * You are free to customize the expansion size, new volume size, new volume size, and filling data * Supports a host of data filling options * Supports TrueCrypt 6.2 and later, TrueCrypt 7.1 and later, and TrueCrypt 8.1 and later * Portable, with no installation needed * Removes TrueCrypt registry keys and also removes all TrueCrypt volumes and partitions * Supports all operating systems, including Windows 8, Windows 7, and Windows Vista * Supports both 32-bit and 64-bit versions of Windows * 64-bit and 32-bit editions of the program * It is distributed as a standalone application * An Easy Setup Wizard is included in the installation package * Command line version of the program available for advanced users MIRRORS The vast majority of sources listed below are absolutely free for all users to use.
